THE LOW COST SOLUTION

Barcode-printing - easy and versatile from (SAP/printer) server

- Are you SAP-User?
- Do you print one-dimensional or two-dimensional Barcodes?
- Do you prefer a server-solution because of cost-saving?

If you can answer these questions with YES - we can provide you THE solution!

If you install iXBC only once on the SAP (or printer-) server, immediately all PCL and PostScript-printers on the network will be able to print Barcodes. This application is network-localization independent and usable for all current Barcode-types. Of course, if required, we can offer you a program for the installation directly at the client.

Why iXBC?

- central-Software instead of Barcode-Hardware in all printers
- a very cost effective purchase
- no extra costs for support, operation and training
- it can be installed on a SAP-server, on a print-server or on an output-management-system
- easy and uncomplicated installation

- high reliability
- flexible for upgrading and modifications
- large productivity because of server-operation
- automatic batch processing is possible

- independent on releases of SAP
- uses original SAP-formulas without modification
- complete preview in SAP
- supports all current one-dimensional and two-dimensional Barcodes

- unlimited data length for two-dimensional Barcodes
- permanent upgrading of new Barcode-types
- all laser printers will be able to print Barcodes
- no more investments for Barcode SIMM or special printers
